EDUCATION

Sacred Heart University, Jack Welch College of Business and Technology **Fairfield, CT**
Bachelor of Science in Computer Science, Math and Honors Minors **May 2027**
Awards and Activities: President's Excellence Award, Thomas More Honors Scholarship **GPA: 3.51**
Relevant coursework: Data Structures, Discrete Structure, Computer Systems Organization, C Programming
Concepts, Software Engineer, Linear Algebra, Probability, Calculus II, Calculus III

TECHNICAL SKILLS

Languages: Python, JavaScript, C, TypeScript, SQL, HTML/CSS
Frameworks & Libraries: React, React Native, Expo, Flask, Pandas, Matplotlib, NumPy
Databases & Backend: PostgreSQL, MySQL, SQLite, Supabase
Tools & Technologies: Git, GitHub, REST APIs, AWS, Clerk, Plaid, OpenAI API

EXPERIENCE

S.F. EXPRESS CO. LTD **Shenzhen, China**
AI Engineer Intern **Jul 2026 – Aug 2026**

- Led the development of an end-to-end AI calling system, integrating ASR, LLM, and TTS components to automate voice interactions from speech recognition through AI-generated responses and speech synthesis
- Benchmarked 15 AI services across 5 ASR, 5 LLM, and 5 TTS solutions, including DeepSeek, Tencent, and Alibaba Cloud, evaluating accuracy, response quality, and latency to identify optimal service configurations
- Optimized the AI voice pipeline to reduce end-to-end calling latency from ~7 seconds to 1-3 seconds, achieving up to 86% reduction, by identifying performance bottlenecks and optimizing service selection

School of Computing and Engineering – UConn Women's Basketball Research **Fairfield, CT**
Research Data Analyst **Aug 2026 – Present**

- Analyzed 2 years of de-identified athlete time-series data from Plantiga in-shoe IMU sensors using Python, pandas, and NumPy to clean, validate, transform, and organize movement data for individual-athlete analysis
- Evaluated relationships among workload, impact, push-off, G-load, jump activity, playing time, rest days, and movement asymmetry using statistical analysis, correlation, and data bucketing
- Developed data-processing and visualization workflows using pandas and Matplotlib to align sensor measurements with practices, games, and training phases and communicate athlete-specific insights to researchers and the UConn Women's Basketball athletic training team

PROJECTS

Ascendra – Personal Finance Mobile Application **June 2026 – Present**
React Native, TypeScript, Supabase, PostgreSQL, Clerk, Plaid

- Engineer a full-stack personal finance mobile application using React Native, Expo, and TypeScript, integrating 5+ technologies across the frontend, authentication, database, and financial-data layers
- Architect a Supabase/PostgreSQL backend with user-specific transaction storage and authentication integration using Clerk, connecting authenticated users to application data
- Develop 3 Supabase Edge Functions for Plaid API integration, implementing link-token creation, secure public-token exchange, and transaction retrieval to establish an end-to-end bank-data pipeline

SidekickAI – AI Desktop Assistant **Jan 2026 – May 2026**
Electron, JavaScript, HTML/CSS, OpenAI API, Codex

- Engineered an AI-powered desktop productivity assistant using Electron and JavaScript, integrating conversational AI, task management, note-taking, and desktop utilities into a unified application
- Integrated the OpenAI API through Electron's main/preload architecture and implemented persistent storage for 4+ data categories, including tasks, notes, user preferences, and conversation history
- Developed 3+ interactive capabilities, including voice input, speech synthesis, and desktop notifications, expanding the application beyond text-based AI interaction

LEADERSHIP & ACTIVITIES

NCAA Division 1 Men's Volleyball Student-Athlete **Fairfield, CT**
Volleyball Player **Aug 2023 - Present**

Office of Undergraduate Admission **Fairfield, CT**
Student Ambassador **Oct 2025 – Present**

SHU CTL Tutor & Classroom Learning Assistant **Fairfield, CT**
Math **Aug 2024 - Present**
